DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-8, the prior art fails to teach the quantum energy of the first ray component and the quantum energy of the second ray component deviating from the K-edge of the XRF marker by less than 10% as claimed in independent claim 1.

Regarding claims 9-10, the prior art fails to teach a method for determining the distribution of an XRF marker in a body volume by irradiation of the body volume with a beam of rays with a first ray component with a quantum energy above the K-edge and a second ray component with a quantum energy below the K-edge of the XRF marker, measurement of the resulting first secondary radiation from the body volume irradiation of the body volume with the beam of rays with a different intensity ratio between the first and second ray components, measurement of the resulting second secondary radiation from the body volume, determination of those components of the secondary radiation which are due to the fluorescence of the XRF marker by comparing the first and second secondary radiations as claimed in independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
